## Course Overview

thinQtank® Learning is offering an industry unique five-day training camp in which students can receive the CompTIA Security+ certification. As with all of our CompTIA Training Experiences, exams are delivered in the classroom.

CompTIA® Security+ is the primary training course you will need to take if your job responsibilities include securing network services, devices, and traffic in your organization. In this course, you will build on your knowledge of and professional experience with security fundamentals, networks, and organizational security as you acquire the specific skills required to implement basic security services on any type of computer network. Students will benefit most from this course if they intend to take the CompTIA Security + SY0-701 exam. The CompTIA Security+ certification is compliant with ISO 17024 standards and approved by the US DoD to meet directive 8140/8570.01-M requirements.

- Proactively implement sound security protocols to mitigate security risks
- Quickly respond to security issues
- Retroactively identify where security breaches may have occurred
- Design a network, on-site or in the cloud, with security in mind

## Course Objectives

- Security+ reading plan
- Security+ review guide
- Security+ certification practice exam

Primary course objectives:

- Identify the fundamental concepts of computer security
- Identify security threats and vulnerabilities
- Manage data, application, and host security
- Implement network security
- Identify and implement access control and account management security measures
- Manage certificates
- Identify and implement compliance and operational security measures
- Manage risk
- Troubleshoot and manage security incidents
- Plan for business continuity and disaster recovery
